SMOOTH JET PLUS are the most versatile and value-for-money nozzles .

They produce a crystal-clear water effect with exceptional results when illuminated at night.

Every Smooth Bore nozzle can be adjusted by °15 off center axis for installation flexibility and water pattern design versatility .

Smooth Bores are usually arranged in groups or on spray rings & lines .

SMOOTH JET PLUS now ship with an internal flow straightener*

This is a great little accessory which does some remarkable work .
 It eliminates pumps turbulence and straightens the incoming water .
 The stream then comes out higher , smoother and crystal-clear .
 The flow straightener is firmly placed inside the nozzle without affecting its dimensions .
